When using the Blue Cross Blue Shield “national” network to look up providers, please note that there is an additional step that needs to be taken to find State of Kansas Blue Cross Blue Shield “network” providers. The BCBS national network is not specific to BCBS of Kansas but rather the National BCBS Association Site.

Please use the following instructions to look up providers on the BCBS provider web site:

1. On the provider network function for the national BCBS network (http://provider.bcbs.com/?prefix=KSE), on the first screen you enter the basic information you are looking for and hit submit:

2. The next page opens with all possible options and the member needs to complete the second step to enter the first 3 digits of their id number. For the SEHP, the member must enter KSE to get the network providers available under the PPO network.
Enter the KSE in the box.
3. Hit GO, and the PPO network with 4 options is shown:

This information pertains to the BCBS web site only and does not apply to the Coventry/PHS or United Healthcare provider directories.
