

Pittsburg State University
Server Administrator Application Form

Server Administrators at Pittsburg State University are responsible for maintaining their server. This includes security (physical and virtual), patching (application as well as operating system), and day-to-day server maintenance.

The following person will be the server administrator for the designated server and all data contained therein. The signature of the chair or director of the department and director or associate director of the Office of Information Services attest to the fact that the applicant is responsible for all related administration of the server listed below.

Note: By submitting this application, you are agreeing to abide by OIS's "Networked Systems Policy" and and your department agree to pay all associated fees (network connection fees, etc) for this server.
