Re: **H1N1 Vaccine Now Available**

---

Under the direction of Crawford County Health Department Health Officer, Janice Goedeke, we are now able to offer the inactivated H1N1 vaccine to any individual with or without a chronic medical condition. We have a limited supply of vaccine available at this time. We are offering the vaccine to current PSU students, faculty and staff, and spouses of faculty and staff. We will not be offering the vaccine to children of students, faculty or staff at this time. Please check our website [www.pittstate.edu/health](http://www.pittstate.edu/health) for updated H1N1 information

If you would like to schedule an appointment to receive the H1N1 vaccine - please call 235-4452. Students may schedule an appointment online at [www.pittstate.edu/health](http://www.pittstate.edu/health). You may also walk-in between 8 am and 4 pm at our new location at 1801 S Broadway. The H1N1 vaccine is being offered free of charge.
