

Pittsburg State University  
Health Simulation Center

Guidelines

The simulators used in the Health Simulation Center at Pittsburg State University are highly complex and sophisticated state-of-the-art physiological models of a human patient. The following list represents what our expectations are of you, the learner, to make your experience in the center a positive one.

- No food or drinks are allowed in the rooms with the simulators.
- Please remove jewelry which might puncture or otherwise damage the simulators. Watches may be worn.
- Pencils are to be used for documentation in the patient rooms. Please keep them at a distance from the simulator as they will permanently damage the skin.
- Wear your proper uniform and name badge. Come prepared with all materials you would bring to any clinical site.
- Treat the simulator with the same care that you would a patient. They are well built but like a human, they can be damaged.
- Immediately report any technical problems with the simulator to the HSC staff. Please do not try to fix the problem yourself.
- Please maintain confidentiality as this helps us to provide a safe environment for learners at all levels. Confidentiality applies to your interactions before, during, and after the simulated experience. This includes other students' actions, type of scenario, simulator successes and failures, and sharing of materials which are being used under copyright agreements with the manufacturer.
