

The Twentieth Annual K-INBRE Student Research Symposium (2022)

The 20th Annual K-INBRE Symposium was once again held virtually on January 13 – 14, 2022. Pitt State was well represented with faculty and 14 students attending from the Biology, Chemistry, Psychology, and HHPR departments. BioKansas sponsored the poster session, where 99 posters were presented by students from across Kansas institutions. Twelve of our K-INBRE scholars presented their work. Paul Worlsey (undergraduate Biology major) and Caine Duran (undergraduate Chemistry major) received awards for their poster and oral presentations, respectively. Both Paul and Caine are mentored by Dr. Santra. Thanks to all of the K-INBRE students for presenting their research and to the faculty mentors who supervised their research and attended the meeting. We look forward to the next symposium that will be held in-person in January 2023.
