Guidelines for Applying to the Master of Science (MS) in Biology Program Pittsburg State University (Pittsburg, Kansas)

Description of Program:

There are three options available to students interested in obtaining a MS in Biology from PSU (see below). Typically, MS degrees are obtained within two years of matriculation. Individual master's programs are developed by the student in consultation with her or his faculty advisor and a graduate committee. Areas of study depend on the research interests of individual faculty. A limited number of graduate teaching assistantships become available each year in the department. These provide a small stipend and valuable teaching experience. Assignments are usually made to the laboratory sections of undergraduate courses. If accepted as a graduate student, you will receive an application for an assistantship with your admission packet of information.

- Option I Thesis A minimum of 30 credit hours including the requirements below.
 - o BIOL 800 Seminar (minimum of one hour)
 - o BIOL 801 Introduction to Research
 - BIOL 890 Research and Thesis (4-6 hours)
 With the approval of the advisor and chairperson, up to nine hours may be taken outside the Department of Biology. All full-time graduate students are required to attend graduate seminar when offered.
- Option II Problem A minimum of 32 credit hours including the requirements below.
 - o BIOL 800 Seminar (minimum of one hour)
 - o BIOL 801 Introduction to Research
 - BIOL 891 Research Problems (3-6 hours)
 With the approval of the advisor and chairperson, up to nine hours may be taken outside the Department of Biology. All full-time graduate students are required to attend graduate seminar when offered.
- Option III Professional Masters A minimum of 36 credit hours including the requirements below.
 - o BIOL 800 Seminar (one hour)
 - o BIOL 801 Introduction to Research (3 hours with a grade of B or higher)
 - o BIOL 803 Biometry (3 hours)
 - BIOL 892 Professional Experience (3 hours)
 This option is intended for science professionals (e.g., in-service teachers and individuals in environmental, ecological, or biotechnological careers) who need more experience and focused preparation in areas of biological science.

Admission Requirements:

Students must have completed a BS in Biology with at least 25 hours of acceptable undergraduate courses in biology. These should include fundamental courses in botany, ecology, zoology, genetics, microbiology, and physiology. A cumulative total of 13 hours of chemistry, including organic chemistry, is required. However, a student may count certain senior-graduate or graduate level chemistry for the degree requirements upon the recommendation of the advisor.

How to Apply:

The application has two phases: an initial application and a final application. For the initial application, the applicant must send a letter of intent, PSU Biology Graduate Admission Application Form, and official transcripts (see below for more details) to biol-graduate@pittstate.edu. For the final application, the applicant needs to submit other documents as required by the Pitt State Graduate School (see below). The overall procedures for the application are shown below.

Initial Application Procedure:

Step 1: Complete the PSU Biology Graduate Admission Application Form which can be found below. Be sure to indicate which faculty member(s) you would be interested in working with.

Step 2: Write a formal "letter of intent" to state your area of research interest, scholarly experience, and academic and career goals. The letter should include at least 250 words. This letter is essential and extremely important for the department to process and consider your application. The application will be processed ONLY AFTER this letter is received.

Step 3: Send the letter of intent, PSU Biology Graduate Admission Application Form, and official transcripts together via e-mail or mail to:

Graduate Coordinator
Department of Biology
Pittsburg State University
1701 S. Broadway
Pittsburg, KS, 66762
biol-graduate@pittstate.edu

Note: Only when all documents, including your letter of intent, PSU Biology Graduate Admission Application Form, Reference Forms, and official transcripts are received, will your application be processed. **No exceptions.**

Final Application Procedure:

This should only be completed after being informed by the Department of Biology that your application is complete <u>and</u> that a faculty member has agreed to serve as your advisor/mentor.

Step 1: Visit the homepage of the Pitt State Graduate School (https://www.pittstate.edu/graduate/) and fill out the Graduate Studies Application by clicking the "APPLY" button located on the website.

Step 2: Distribute three PSU Biology Graduate Reference Forms (available on the website or at https://bit.ly/psubiogradreference) to your references and ask them to submit them in a timely manner to the address shown above in the initial application instructions (e-mail submission of a scanned copy is acceptable).

	Aquatic Biology
	Botany
	Conservation
	Ecology
	Entomology
	Environmental Biology
	Fisheries Management
	Ichthyology
	Limnology
	Wildlife Management
	Zoology
6.	Please select the name(s) of the Biology Department faculty member(s) who you would like as your research advisor based on shared research interests (maximally three faculty members can be chosen).
	Peter Chung: Professor of Microbiology. Specialties: microbiology, molecular biology (nucleic acid manipulation and
	protein expression systems in microbes and coccidia), tissue culture
	Christine C. Brodsky: Associate Professor of Biology. Specialties: urban ecology, environmental education
	Andrew D. George: Associate Professor of Biology. Specialties: ornithology, herpetology, ecology, wildlife management
	Anu Ghosh: Associate Professor of Biology. Specialties: molecular and environmental microbiology, ecology of ticks
	Phillip Harries: Professor of Molecular Biology. Specialties: synthetic biology, plant viruses, cellular and molecular
	biology of plants
	Hermann Nonnenmacher: Professor of Biology. Specialties: plant ecology, entomology
	Mandy Peak: Professor of Biology. Specialties: molecular and cellular biology, biochemistry
	Neal Schmidt: Instructor. Specialties: anatomy and physiology; pharmacology
	Neil Snow: Professor of Botany and Director, T. M. Sperry Herbarium. Specialties: plant systematics, plant identification,
	herbarium management
	James E. Whitney: Associate Professor of Biology. Specialties: ichthyology, fisheries management, ecology
	Daniel Zurek: Professor of Biology. Specialties: cellular and molecular biology, biotechnology, and plant molecular
	physiology.
