Get Empowered!

Friday, December 13, 2013

at the
**Pittsburg State University
Kansas Technology Center**
8:00 AM to 3:00 PM

Check-in begins Friday at 7:30 AM

C&M Enterprises will be providing 6 Code based hours of training on the:

Analysis of Changes to the 2014 NEC®

Analysis of Changes to the 2014 NEC®

This overview and analysis provides a jumpstart into the more significant changes that impact all electrical work. Over 3,700 proposals and 1,600 public comments, processed by twenty code making panels, have shaped the 2014 NEC® into a code unlike its predecessor. While all of the changes cannot be covered in this training event, this course is intended to provide detail into the more significant changes adopted into the 2014 National Electrical Code NEC®. Specific changes can be addressed which impact a particular state, region, or jurisdiction. The accompanying coursework, "Analysis of Changes, 2014 NEC®", published by the International Association of Electrical Inspectors® (IAEI®) provides attendees with "up-close-and-personal" insight and detailed reference into approximately 300 of the more crucial changes to this latest version of the NEC®. While NEC® codebooks may be helpful and always recommended, this course is designed to provide all the necessary information to explain and understand the latest changes without additional materials. The PowerPoint presentation and the coursework provided for this training will ensure maximum exposure to the more significant changes and allow for attendees to reference all of the significant changes (with accurate and authoritative interpretations) easily after the seminar via the detailed coursework published by IAEI®. This course is especially suited for contractors, tradesmen, design professionals and code officials with a "need-to know" regarding the latest version of the NEC®. Those attendees will be able to recognize and analyze the changes that impact both new and existing electrical installations.

This course qualifies for 6 contact hours of Code based continuing education for Kansas electricians for more information see: CandMenterprises.net

CEU's

Recognized as Code based by:

Kansas Mechanical Trades Review board
Wichita Area Electrical Education Review Board
Johnson County Contractor Licensing
