Get Empowered!

Friday, December 16, 2016

at the

Pittsburg State University

Kansas Technology Center

8:00 AM to 3:00 PM

Check-in begins Friday at 7:30 AM

C&M Enterprises will be providing 6 Code based hours of training on Hazardous Locations & Requirements

Hazardous Locations & Requirements - 2014 NEC®

This overview on hazardous locations provides both entry level introduction and in-depth review into the 2014 NEC® requirements for hazardous locations governed under Articles 500 through 516. This course specifically addresses the impact of changes and modifications to hazardous location installations which result from the latest 2014 NEC® revision cycle. The accompanying provided coursework "Hazardous Locations 4th Edition", published by the IAEI®, provides attendees with up close-and-personal instruction into the specifics surrounding electrical installations in and about hazardous locations. While all of the material cannot be covered in a single session, this course will provide excellent introduction and detail into the more relevant, most-frequently used applications surrounding hazardous location requirements. NEC® codebooks may be helpful and always recommended, but this course is designed to provide all the necessary information to explain and comprehend Articles 500 through 516 and related articles of the NEC® without additional materials. The PowerPoint® presentation and the provided coursework will ensure maximum exposure to the material covered and provide attendees future reference after the training via the detailed coursework published by IAEI®. This course is especially suited for contractors, tradesmen, design professionals, code enforcement and anyone who may be involved in hazardous location electrical installations. Attendees will have maximum exposure to the most authoritative information available on the most mysterious portions of the National Electrical Code®.

This course qualifies for 6 Code based hours of continuing education for Kansas electricians. For more informations see: CandMenterprises.net
