Get Empowered!

Friday, December 17, 2010

at the

Pittsburg State University

Technology Center

8:00 AM to 3:00 PM

Check-in begins Friday at 7:30 AM

C&M Enterprises will be providing training on **Motors, Conductors, & Protection** under the **2008 NEC®**

Motors, Conductors, and Protection, 2008 NEC®

This in-depth code based six-hour course provides specific user information for the general application of motors, motor conductors and motor protection. Specific sizing and protection requirements of various motor circuit componentry, which is found in the typical motor circuit, is outlined in a detailed step process revealing both the calculation requirements and governing code sections related to motor circuit componentry sizing and based upon the requirements of the 2008 NEC®. While NEC® codebooks (always recommended) and calculators may be helpful, this course is designed to provide all the necessary information and coursework to explain, comprehend and complete the motor circuit componentry selection process without additional materials. The coursework, published by C&M Enterprises, contains additional calculation procedures necessary for general commercial and industrial construction. This course is especially suited for master and journeyman electricians, design professionals and others with a need-to-know regarding some the basic motor circuit selection and calculation processes required for NEC® compliance.

This course qualifies for 6.0 Code contact hours of continuing education for Kansas electricians for more information see: CandMenterprises.net

A Nationally recognized leader in electrical education and an approved Education Provider for Kansas CEU's.
