

Soares Grounding and Bonding Training Event

Friday, Dec. 18, 2009

Pittsburg State University

Fri. 8AM - 3PM

Check-in begins Friday at 7:30 AM

C&M Enterprises will be providing training on Grounding and Bonding under the 2008 NEC®

Don't be caught without your CEU's, classes do sell out.

This one-day overview on grounding and bonding provides insight into the most misunderstood region of the National Electrical Code®. The accompanying coursework (provided in the seminar cost) "Soares Book on Grounding and Bonding 10th Edition", published by the IAEI® provides attendees with up-close-and-personal instruction into the mystery surrounding the grounding and bonding of electrical systems. While all of the material cannot be covered in an eight hour session, this course will provide excellent detail into the more relevant, most-frequently used applications surrounding the grounding and bonding requirements. NEC® codebooks may be helpful and are always recommended, but this course is designed to provide all the necessary information to explain and comprehend Article 250 and related articles of the NEC® without additional materials. The PowerPoint presentation and the coursework provided will ensure maximum exposure to the material covered and the coursework will provide future reference after the seminar. This training is especially suited for electricians, contractors, tradesmen, design professionals, code officials and anyone who still has questions about the grounding and bonding of electrical systems. Attendees will have maximum exposure to the most authoritative information available on the most mysterious portions of the National Electrical Code®, and will qualify for CEU's.

Frequent Training Program: C&M Enterprises is offering a \$20.00 credit for returning attendees. See website for details.

Register early at: CandMenterprises.net **Cost: \$169.00** (early registration) or \$209.00 at the door. *Space permitting*
