Name of Existing Major or Minor/Emphasis/Certificate: International Business

If proposing a name change to major or minor/emphasis/certificate, indicate Proposed Name Change:

Description of Change: Updating the International Business major to reflect the new Pitt State Pathways and the KBOR 120 hour mandate. Also adding MGT 210 Business Professionalism to the Kelce Core.

Rationale for Change (include changes to curriculum objectives): These changes bring the curriculum up to date and are designed to prepare majors for their careers.

Is this revision related to, and/or may affect, any degree program or minor/emphasis/certificate at any other Regent university?

Yes No

Whether a "yes" or "no" response, please provide an explanation.

This is a stand alone major. It is independent of other Regent institutions.

Is this revision related to, and/or may affect, any other department's/college's/unit's curricula or programs at Pittsburg State University?

Yes No

Whether a "yes" or "no" response, please provide an explanation. Provide documentation of any discussions (e.g. copies of e-mails, memos, etc.) that have occurred.

Other majors offered through the Kelce College are being revised simultaneously to reflect the change in the Kelce Core and the 120 hours mandate.

Notification to COCAO/Kansas Board of Regents (if required): Date: _____

Each college curriculum representative will notify their respective college and department(s) of the completion of the approval process. If COCAO/KBOR approval is required, questions should be directed to the Provost's administrative officer at x4113.

Originating Department(s): After completing this form, in its entirety, please upload it to the Zimbra Briefcase, "Undergraduate Curriculum Legislation" (within the appropriate College folder, "Preliminary Legislation"), to allow for review and questions. Any modifications should be saved as "original file name.version2.docx" and uploaded as well.

Following final College Curriculum Committee approval, please print the final version of this form, apply the appropriate signatures, and forward to the Office of the Registrar.

Following Faculty Senate Approval, SUBMIT (if required) SIGN-OFF SHEET AND FINAL COMPLETE PACKAGE, in electronic format, TO THE OFFICE OF THE PROVOST (220 RUSS HALL). Please check with the Provost's administrative officer at x4113 if unsure.

Please Note: This is at least a 2-3 month process from the time of first submission and is designed to eliminate concerns and questions at the beginning of the process. Any questions/concerns not addressed prior to the review by the College Curriculum Committee and the Faculty Senate University Undergraduate Curriculum Committee, may result in an additional month added to the process, before it is sent (if required) to the Kansas Board of Regents, which may result in a delay in implementation.

None

2. Will any additional student fees be required (e.g. equipment, clothing, travel, licensing, etc.)?

Yes No *If "yes," please realize that it will need to gain approval of the President's Council.*

Please give the rationale for additional student fees:

3. Will this revision have specific General Education courses required? Yes No

Please realize that it will need to gain approval of the General Education Committee.

4. Will this revision affect any education majors? Yes No

If "yes," please realize that it will need to have the approval of the Council for Teacher Education.

5. What additional costs will be required for this modification (e.g. staffing, equipment, etc.)?

None

Additional Questions for certificate only:

1. Are students pursuing only this certificate eligible for federal financial assistance based on federal guidelines? (minimum of 24 hours) Yes No

2. Does the course content contained within this certificate provide relevance to employment opportunities or meet professional objectives for the student? Yes No

If "yes," to both questions, it is the department's responsibility to send a copy of this legislation form to the Director of Financial Assistance to initiate Department of Education approval.

Name of Existing Major or Minor/Emphasis/Certificate: Business Economics

If proposing a name change to major or minor/emphasis/certificate, indicate Proposed Name Change:

Description of Change: Updating the Business Economics Major to reflect the new PSU Pathway and the KBOR 120 hour mandate. Also adding MGT 210 Business Professionalism to the Kelce Core. Added Econ 201 Principles of Macroeconomics as a major requirement.

Rationale for Change (include changes to curriculum objectives): These changes bring the curriculum up to date and are designed to prepare majors for their careers.

Is this revision related to, and/or may affect, any degree program or minor/emphasis/certificate at any other Regent university?

Yes No

Whether a "yes" or "no" response, please provide an explanation.

This is a stand alone major. It is independent of other Regent institution.

Is this revision related to, and/or may affect, any other department's/college's/unit's curricula or programs at Pittsburg State University?

Yes No

Whether a "yes" or "no" response, please provide an explanation. Provide documentation of any discussions (e.g. copies of e-mails, memos, etc.) that have occurred.

Other majors offered through the Kelce College are being revised simultaneously to reflect the change in the Kelce Core and the 120 hour mandate.

Name of Existing Major or Minor/Emphasis/Certificate: Community and Worksite Wellness Emphasis as part of the Bachelor of Science in Recreation Services, Sport and Hospitality Management

If proposing a name change to major or minor/emphasis/certificate, indicate Proposed Name Change:

Description of Change: The current Community and Worksite Wellness Emphasis includes a total of over 120 credit hours. This change reduces the required coursework to meet the 120 credit hour requirement.

Rationale for Change (include changes to curriculum objectives): The change will not affect curriculum objectives and students will have more flexibility with added electives with an option of these going towards a recommended minor..

Is this revision related to, and/or may affect, any degree program or minor/emphasis/certificate at any other Regent university?

Yes No

Whether a "yes" or "no" response, please provide an explanation.

This change will not affect other degree programs or minor/emphasis/certificates at any other Regent university.

Is this revision related to, and/or may affect, any other department's/college's/unit's curricula or programs at Pittsburg State University?

Yes No

Whether a "yes" or "no" response, please provide an explanation. Provide documentation of any discussions (e.g. copies of e-mails, memos, etc.) that have occurred.

This change will not affect other departments as current minors associated with this emphasis will continue to be recommended.

Hi Derek,

I am contacting you to find out if you would approve of HHP 460 - Kinesiology, to be added to the list of electives Therapeutic Recreation students can select from to complete their major. Therapeutic Recreation students are required to complete A & P, so there shouldn't be a pre-req issue with this class.

Due to the 120 credit hour requirement, I will need to remove the requirement of students choosing a minor. I will be replacing the nine credit hours left (with the removal of the minor) with a list of electives helpful for the students education. If students would choose to take this course, it may add at the most three students, but more than likely maybe one a semester.

Please let me know if you have any concerns about class sizes or other areas with the addition of this course to the chosen list of electives for the Therapeutic Recreation program.

Thank you,
Laura

Hi Laura,

Of course! Any of your students are more than welcome to take the class. I'm not sure when we will change our program, but when that happens we plan to have a chemistry course as one of the pre-reqs. I can't remember the exact course off of the top of my head right now though. I just want to let you know that the pre-reqs might change in a few years. That additional pre-req will be beneficial for your students who are looking at professional programs.

Please let me know if I can help with anything else.

Thanks,
Allie

This is a great question. As of now, I see at the most maybe three students from the TR program a semester taking either Educational Psych or Group Processes. This number could change if we grow, but right now we've been steady with about 30 total students with the TR emphasis.

Please let me know if you have any further questions.

Hi Laura,

Thanks for checking with me about the potential courses being added as electives for your students. Do you know how many students that might impact per semester for each course? I'm just asking since there is a cap of 10 undergrads allowed into Intro to Group Processes (with the other half saved for graduate student enrollment). I am almost always giving overrides to undergrads to accommodate more. There is also a cap of 60 in Ed Psych and I have 60 enrolled in my section this semester. There is generally a second section usually offered in the fall and spring, but it may not always fit students' schedules.

I will be replacing the nine credit hours left (with the removal of the minor) with a list of electives helpful for the students. I know TR students are already taking the listed courses for the Psychology minor, but would like to have your approval for the change I am making to the TR program overall.

Please let me know if you have any concerns about class sizes or other areas with the addition of these courses to the chosen list of electives.

**Thank you,
Laura**

Hi Laura,

Motor Development would be a great class to add as an elective for your students. I have no problem with it. I copied Dr. Oppliger on the email for his thoughts as well.

Subject: Addition of Course for TR Elective

Hi Cole,

I am contacting you to find out if you would approve of HHP 466 - Motor Development, to be added to the list of electives Therapeutic Recreation students can select from to complete their major.

Due to the 120 credit hour requirement, I will need to remove the requirement of students choosing a minor. I will be replacing the nine credit hours left (with the removal of the minor) with a list of electives helpful for the students education. If students would choose to take this course, it may add at the most three students, but more than likely maybe one a semester.

Please let me know if you have any concerns about class sizes or other areas with the addition of this course to the chosen list of electives for the Therapeutic Recreation program.

Thank you,
Laura

One course will focus on mathematic content and instruction for the Primary grades and one course will focus on the Intermediate Grades.**Objectives/Student Learning Outcomes (as it will appear in the syllabus)****Course Objectives:**

1. Compare the similarities and differences in teaching the Kansas College and Career Ready Standards for Mathematics content domains and Standards of Mathematical practices.
2. Apply principles of mathematics inquiry, problem solving methods, and techniques in developmentally appropriate ways.
3. Review, as needed, mathematics content from the two prior mathematics content classes.
4. Identify the specific learning needs of mathematics students at various stages of development.
5. Use a variety of methods to determine students' misconceptions and assess their understanding.
6. Write/adapt/differentiate mathematics lesson plans, and using the learning cycle, for a diverse group of learners.

7. Gather and use a variety of print and electronic resources appropriate for the elementary level and use digital platforms for group interaction.
8. Identify connective points between the theory taught in class and the lived mathematics in the field.
9. Apply reflective metacognitive processes to deepen competency and understanding of mathematics.
10. Act with increased levels of expertise, collaboration, and professionalism required for teachers in the field.
11. Write and communicate effectively at a collegiate level using APA 6, proper citations, and evidence.

Assessment Strategies [e.g., exams, projects, university rubric, etc. (as it will appear in the syllabus)]

Module Quizzes: 10 pts each, Classroom Assignments/Exit Cards 5pts or 10 points each, Four classroom observations: 20 pts each, Planning (Joint): 25 pts, Lesson Plans: 60 pts, Math Fair Board/Engagement/Teaming (joint): 30 pts, Reflection (Individual): 50 pts, LARK Cooperative Score: 35 pts, Reflection and Work Exemplars: 50 pts.

If you wish to attach a syllabus, you may attach it to the end of this document as part of the packet.

Additional Questions

1. Additional resources required (e.g. library or multimedia resources, technology, space, major expense, etc.):

No

2. Will any additional student fees be required (e.g. equipment, clothing, travel, licensing, etc.)?

Yes No

If "yes," please realize that it will need to gain approval of the President's Council.

Please give the rationale for additional student fees:

3. Is this course to be considered for General Education? Yes No

If "yes," please indicate the University's General Education Goals met by this course AND the assessment data that will be collected to measure these goals:

Please realize that it will need to gain approval of the General Education Committee.

4. Will this course be required of any education majors? Yes No

If "yes," please realize that it will need to have the approval of the Council for Teacher Education.

5. What additional costs will be required for this course (e.g. staffing, equipment, etc.)?

Course Description and Prerequisites

Primary Elementary School Mathematics involves the study of the central concepts, tools of inquiry, teaching best practices, and structures of mathematics appropriate for students in grades 3-6. Teacher candidates learn how to plan, implement, and assess mathematical learning experiences designed to engage all students in critical thinking, creativity, and collaborative problem solving appropriate for pre-operational learners. Assignments in this course are aligned with the KSDE Elementary Program Standards for Mathematics, the Common Core State Standards for Mathematics, and the National Council of Mathematics Teacher Practices (PSU Course Catalogue, 2019). The prerequisite to enter this course requires admission to the teacher education program as-well-as passing Math 304 Mathematics for Education II with a grade of C or better. The course may also be taken for departmental academic honors.

Course Text and Materials

- Van De Walle, J.A., and Lovin, L.H (2017). *Teaching Student-Centered Mathematics: Developmentally Appropriate Instruction for Grades PreK-2* (3rd Edition). Boston, MA: Pearson Education, Inc.
- A 1" binder with pockets, college ruled paper, and a set of index tab inserts.

Purpose: The purpose of this class is to make mathematics both accessible and understandable within the context of an elementary classroom. In doing so, you will learn how to move beyond your individual experiences as a K-12 learner to that of a teacher candidate armed with a rich understanding of how to bring elementary mathematics alive for your future students. You will increase your knowledge and confidence concerning teaching integrated mathematics to a diverse array of children, obtain a variety of strategies and tools to inform future curricular decisions, and gain insights into the rigors and requirements needed to be an effective teaching professional in the primary grades.

Course Theme and Essential Question: My short-term practical goals are to help you make the connection between the content of your two prior college mathematics classes and best inquiry mathematics teaching practices used elementary classrooms. However, I do have a long term, systemic goal concerning the kinds of values and habits of mind you bring to the teaching of this subject that spans the two mathematics methods classes. *Mathematics —For the Many, Not the Few* is the guiding theme. As you can tell, there is a very particular viewpoint that will serve as the foundation for our discussions throughout this semester as-well-as to reinforce the college's conceptual framework of a scholar/practitioner. This theme will be explored using a systems approach using one essential question for guidance. It is the following: Is finding the correct balance between the needs of the students, the mathematics content, the teaching, and mine as the teacher possible?

Course Objectives:

1. Use the NCTM Teaching Practices as the conceptual framework for the class.
2. Compare the similarities and differences in teaching the Kansas College and Career Ready Standards for Mathematics content domains and Standards of Mathematical practices.
3. Apply principles of mathematics inquiry, problem solving methods, and techniques in developmentally appropriate ways for the pre-operational child in grades PreK-3.
4. Review, as needed, mathematics content from the two prior mathematics content classes.
5. Identify the specific learning needs of mathematics students at the primary elementary grades.
6. Use a variety of methods to determine students' misconceptions and assess their understanding.
7. Write a variety of inquiry mathematics lesson plans for a diverse group of learners.

8. Gather and use a variety of print and electronic resources appropriate for the elementary level and use digital platforms for group interaction.
9. Apply reflective metacognitive processes to deepen competency and understanding of mathematics.
10. Act with increased levels of expertise, collaboration, and professionalism required for teachers in the field.
11. Write and communicate effectively at a collegiate level using APA 6, proper citations, and evidence.

LARK Course Requirements

Rules are hard to remember particularly if there are a bazillion of them worded in negatives. I have used the LARK rules successfully in upper elementary classes all the way through to graduate classes to frame the required rules of behavior. The acronym represents the following question: Were my actions **Legal, Appropriate, Responsible, and Kind**? If the whole class, teacher included, can answer yes to these questions on a routine basis, then we will be able to form a respectful, warm learning environment this semester. The items below will help define what LARK looks like in action.

Attendance and Participation: Being in class is an expectation of mine and PSU. As a teacher, you wouldn't skip a day and leave your kids and principal hanging. Nor would you wander in 10 minutes late. Best start to get in the professional habit from the start. 10 points added to your overall points at the end of the semester to your total grade for no days missed for whatever reason. One absence will get 5 bonus points. Two days receive no bonus points. If you are absent three or more days, regardless of the reason, you will be dropped from the class or your overall grade will be reduced. Please note that if you are late three times, it equals an absence.

Communication

On Friday, I will post specific readings and assignments for the upcoming week on our Canvas site in the Announcement section and the landing page of our site. We will be using Canvas for whole class assignments and grades. Changes in pacing or tweaking of assignments, in response to the needs of the class, *will* occur. Be alert! Concerning emails, generally I check my email in the morning and the afternoon of the work week. I don't answer emails during the weekend except for Sunday evening.

Email Protocols: Constructing professional emails is part of professional interaction and has its own specific kinds of etiquette, nuance and meaning. Messages without correct salutations, upper case letters, major typos, slang or written in such a way that the tone could be called into question communicates far more about the sender than he or she intends. Consequently, when an email is sent it should be crafted by professionalism and care to your peers, professors, and to people out in the community. Things to think about before writing are:

- Would I say in person what this email specifically says?
- How could this email be misconstrued?
- Does this email represent my highest self?
- Am I sending this email to avoid a face-to-face conversation?

In like terms, if there is ever a concern about an email I send you, let's talk in person so there is no confusion.

Facebooking, Texting, and Other Distracting Behavior in Class. We will be using our cell phones, laptops, or Chromebooks a great deal in class *for work*. Note the italics. Engaging in the listed behaviors during class time is an educational buzz kill for not only me but those around you during class. While you may be okay with being distracted, it also distracts everyone who can see your screen or your furious fingers but also sends a firm message of disrespect and disinterest in what is going on. This is a **personal hot button of mine** in terms social etiquette and fostering of a warm, professional learning community so best keep things on the straight and narrow.

Working in Groups

Teaming and Collaboration: Working in *effective* collaboration with others is part of being a teacher. You will be working in several stable cooperative work groups and you will need to form proactive, working relationships each time. With questions for minor items, your current teammates are your "go to" experts. For bigger items drop me an email, chat with me during break or set up an appointment. **Don't make assumptions, go right to the source.** If you don't talk to me, there is no way I will know how I can help you. Part of my job is to help you maneuver hard items and gain deeper understanding. More often than not, fixing any misunderstandings is easy and quick if caught early.

Group Work vs. Individual Work: Because collaboration is a strong aspect of this class with many group investigations and collaborative papers, it is worth reiterating how to generate original work product. The following do NOT qualify: (1) changing a few phrases or rearranging orders of sentences from another source without citation; (2) using your own words but blocking out logic and main assumptions from another source without citation; (3) copy and pasting resource lists in APA from another rather than doing your own; and (4) of course, flat out copying, pasting or taking someone else's paper. Depending on the circumstances, the

Bridgette Fincher | Primary Elementary School Mathematics

Remember: I retain the right to change the syllabus, schedule, and assignments at any time.

consequences of not having your own work produce can range from redoing the assignment for a reduced grade, obtaining a zero on the assignment with a concern form being filed, failing the class, all the way to being brought up before the academic review board. TurnItIn for assignments in Canvas will be used for submission of major assignments.

Statement of Academic Honesty: Being honest is a fundamental aspect of professionalism. As such, this class sticks firmly to the PSU Academic Honesty Policy which speaks to unethical acts associated with coursework or grades. This policy can be found online at <http://www.pittstate.edu/audiences/current-students/policies/rights-and-responsibilities/academic-misconduct.dot>. Students with questions about how these policies apply to this particular course or assignment should immediately contact me.

Major Assignments and Grading

PSU Work Product	Observations
Module Quizzes: 10 pts each. Classroom Assignments/Exit Cards 5 pts or 10 pts each.	Virtual Case Studies: 20 pts each.
Lesson Planning	Final
Inquiry Lesson Plans (10 or 15 pts each). Mathematics Book Talk (15 pts)	LARK Cooperative Score: 35 pts. Reflection and Work Exemplars: 50 pts.

Grading: The class follows the typical cut off points. (A at 90, B at 80, C at 70, and D at 60). Key papers and projects are scored using specific assignment rubrics.

Late Work: Part of your job is to be proactive in your own learning by being organized, prepared and ready to go inside and outside of class. Remember the rule of three, for every upper level class hour, you will spend an average of three hours outside of class preparing. On the larger assignments, if you contact me before an item is due, we can do some problem solving together so that we can come up with an appropriate work around. Otherwise, everything is due when it is due. If you miss an assignment, with no prior contact and conversation before the due date, the assignment be accepted but with a deduction of 10% *per day*.

Questions about a Grade: If you have a question about a grade, which can happen as professors are humans as well and can make a mistake or two, send me an email stating the grade and detailing your reasoning *within 48 hours* of the grade being posted. Doing so allows for both of us to think and discuss the item without taking time away from the other students in class.

Overall Grade for the Class:

For me to *consider* rounding up to the next whole letter grade, like from a 79 to an 80, you will have had to have missed no more than 1 class, have turned in the major assignments satisfactorily (C or better) on time, and have active, positive communication with me *throughout* the semester.

Pittsburg State University Policies and Practices

ADA Statement: Pittsburg State University requires that students with disabilities are provided reasonable accommodations to ensure their equal access to course content. If you have a documented disability and require accommodations, please contact me privately at the beginning of the semester to make arrangements for necessary classroom adjustments. Please note, you must first verify your eligibility for these through the Center for Student Accommodations (contact 620-235-4309 or visit <http://www.pittstate.edu/office/center-for-student-accommodations.>)

Praxis II Series: Principles of Learning and Teaching (PLT) and Content – Required for Admission to Professional Semester (Student Teaching)

The Praxis II exams are offered in a computer delivered format offered in testing windows. The test is taken at the Testing Center, 206B Whitesitt Hall or any other Prometric testing center according to their available schedule. A list of Prometric testing centers and registration is completed by going to www.ets.org/praxis. Candidates should go to <https://www.ets.org/praxis/ks/requirements> to identify the correct Praxis exams required for the state of Kansas.

All Elementary Education (Early/Late Childhood K-6) majors must take and pass the following two exams prior to admission to Professional Semester (Student Teaching)

- Required Component PLT Principles of Learning and Teaching: K-6 Content for Elementary
- Elementary Education: Curriculum, Instruction, and Assessment

Student teacher candidates for the fall semester must have both exams successfully completed and reported to the Office of Teacher Education by May 1. Candidates for the spring student teaching semester will be required to have successfully completed both exams and have scores reported to the Office of Teacher Education by November 1. Be aware that for ALL exams it takes approximately four weeks for scores to be returned to PSU Office of Teacher Education.

The Pittsburg State College of Education Professional Knowledge Base

Listed below are the basic descriptions of the core areas of the Professional Knowledge Base that inform the activities in class. For a full listing of the subskills, go to <http://www.pittstate.edu/college/education/teacher-education/pro-knowledge-base.dot>

The Learner and Learning- Professional educators must understand that learning and development patterns vary among individuals, that learners bring unique individual differences to the learning process and that learners need supportive and safe learning environments to thrive.

- The candidate knows how learning occurs (how learners construct knowledge, acquire skills and develop disciplined thinking processes) and how to use instructional strategies that promote individual growth.
- The candidate understands and identifies differences in approaches to learning and performance and designs experiences that incorporate individuals' strengths to promote growth.
- The candidate understands the processes needed to foster a respectful learning community.

Content - Professional educators must have a deep and flexible understanding of the field and be able to draw upon the central concepts and structures of their discipline as they work with learners. They integrate cross-disciplinary skills (e.g., critical thinking, problem solving, creativity and communication) to help learners apply content to propose solutions, forge new understandings, solve problems and imagine possibilities. Professional educators connect information to local, state, national and global issues.

- The candidate understands that learners should question, analyze and understand concepts from diverse perspectives.
- The candidate has a deep knowledge of student content standards and learning progressions in the discipline(s).
- The candidate realizes that content knowledge is not a fixed body of facts but is complex, culturally situated and ever evolving. S/he keeps abreast of new ideas and best practices in the field.

Instructional Practice- Professional educators understand and integrate assessment, planning and instructional strategies in coordinated and engaging ways for effective practice. They understand how to design, implement, interpret and communicate results from a range of assessments.

- The candidate knows how to engage learners in multiple ways of demonstrating knowledge and skills as part of the assessment process.
- The candidate understands the positive impact of effective descriptive feedback and knows a variety of strategies for communicating this feedback.
- The candidate understands the theories and processes of curriculum design (appropriate sequencing, developmentally appropriate instruction, builds on learners' prior knowledge and experiences).
- The candidate knows how to incorporate a variety of strategies that stimulate the cognitive processes associated with various kinds of learning (e.g., critical and creative thinking, problem framing and problem solving, invention, memorization and recall).
- The candidate knows how to apply a variety of developmentally, culturally and linguistically appropriate instructional strategies to achieve learning targets.

Course Description and Prerequisites

Intermediate Elementary School Mathematics involves the study of the central concepts, tools of inquiry, teaching best practices, and structures of mathematics appropriate for students in grades 3-6. Teacher candidates learn how to plan, implement, and assess mathematical learning experiences designed to engage all students in critical thinking, creativity, and collaborative problem solving appropriate for concrete operational learners. Assignments in this course are aligned with the KSDE Elementary Program Standards for Mathematics, the Common Core State Standards for Mathematics, and the National Council of Mathematics Teacher Practices (PSU Course Catalogue, 2019). The prerequisite to enter this course requires admission to the teacher education program as-well-as passing Math 304 Mathematics for Education II and EDUC 360 Primary Elementary School Mathematics with a grade of C or better. The course may also be taken for departmental academic honors.

3. Apply principles of mathematics inquiry, problem solving methods, and techniques in developmentally appropriate ways for concrete operational children in grades 3-6.
4. Review, as needed, mathematics content from the three prior mathematics classes.
5. Identify the specific learning needs of mathematics students at the intermediate elementary grades.

6. Use a variety of methods to determine students' misconceptions and assess their understanding.
7. Write differentiated mathematics lesson plans, and using the learning cycle, for a diverse group of learners.
8. Gather and use a variety of print and electronic resources appropriate for the elementary level and use digital platforms for group interaction.
9. Identify connective points between the theory taught in class and the lived mathematics in the field.
10. Apply reflective metacognitive processes to deepen competency and understanding of mathematics.

Required Practicum Hours: As part of your professional teaching block, you have been assigned to a school and a grade level. Fall ECU majors, you will be observing math within your special education placement for Dr. York. Spring ECU majors, you will have a placement secured by Mrs. Hill. You will need to be sure to have blocked in viewing math lessons being taught for an overall total of at least five hours either in your placement or with another teacher within that school. As part of this class, you will be observing and reporting on what you see occurring within your placement specific to mathematics within the context of your discussions in class as well as developing a math lesson based on, and designed for, the students that you observe.

Facebooking, Texting, and Other Distracting Behavior in Class. We will be using our cell phones, laptops, or Chromebooks a great deal in class *for work*. Note the italics. Engaging in the listed behaviors during class time is an educational buzz kill for not only me but those around you during class. While you may be okay with being distracted, it also distracts everyone who can see your screen or your furious fingers but also sends a firm message of disrespect and disinterest in what is going on. This is a **personal hot button of mine** in terms social etiquette and fostering of a warm, professional learning community so best keep things on the straight and narrow.

Working in Groups

Teaming and Collaboration: Working in *effective* collaboration with others is part of being a teacher. You will be working in several stable cooperative work groups and you will need to form proactive, working relationships each time. With questions for minor items, your current teammates are your “go to” experts. For bigger items drop me an email, chat with me during break or set up an appointment. **Don’t make assumptions, go right to the source.** If you don’t talk to me, there is no way I will know how I can help you. Part of my job is to help you maneuver hard items and gain deeper understanding. More often than not, fixing any misunderstandings is easy and quick if caught early.

Group Work vs. Individual Work: Because collaboration is a strong aspect of this class with many group investigations and collaborative papers, it is worth reiterating how to generate original work product. The following do NOT qualify: (1) changing a few phrases or rearranging orders of sentences from another source without citation; (2) using your own words but blocking out logic and main assumptions from another source without citation; (3) copy and pasting resource lists in APA from another rather than doing your own; and (4) of course, flat out copying, pasting or taking someone else’s paper. Depending on the circumstances, the consequences of not having your own work produce can range from redoing the assignment for a reduced grade, obtaining a zero on the assignment with a concern form being filed, failing the class, all the way to being brought up before the academic review board. TurnItIn for assignments in Canvas will be used for submission of major assignments.

Statement of Academic Honesty: Being honest is a fundamental aspect of professionalism. As such, this class sticks firmly to the PSU Academic Honesty Policy which speaks to unethical acts associated with coursework or grades. This policy can be found online at <http://www.pittstate.edu/audiences/current-students/policies/rights-and-responsibilities/academic-misconduct.dot>. Students with questions about how these policies apply to this particular course or assignment should immediately contact me.

Major Assignments and Grading

<i>PSU Work Product</i>	<i>Practicum Observations</i>
Module Quizzes: 10 pts each. Classroom Assignments/Exit Cards 5 pts. or 10 pts. each.	Three classroom observations: 20 pts each.
Lesson Planning Planning (Joint): 25 pts. Lesson Plans: 60 pts. Math Fair Board/Engagement/Teaming (joint): 30 pts. Reflection (Individual): 50 pts.	Final LARK Cooperative Score: 35 pts. Reflection and Work Exemplars: 50 pts.

Grading: The class follows the typical cut off points. (A at 90, B at 80, C at 70, and D at 60). Key papers and projects are scored using specific assignment rubrics.

Late Work: Part of your job is to be proactive in your own learning by being organized, prepared and ready to go inside and outside of class. Remember the rule of three, for every upper level class hour, you will spend an average of three hours outside of class preparing. On the larger assignments, if you contact me before an item is due, we can do some problem solving together so that we can come up with an appropriate work around. Otherwise, everything is due when it is due. If you miss an assignment, with no prior contact and conversation before the due date, the assignment be accepted but with a deduction of 10% *per day*.

Questions about a Grade: If you have a question about a grade, which can happen as professors are humans as well and can make a mistake or two, send me an email stating the grade and detailing your reasoning *within 48 hours* of the grade being posted. Doing so allows for both of us to think and discuss the item without taking time away from the other students in class.

Overall Grade for the Class:

For me to *consider* rounding up to the next whole letter grade, like from a 79 to an 80, you will have had to have missed no more than 1 class, have turned in the major assignments satisfactorily (C or better) on time, and have active, positive communication with me *throughout* the semester.

Praxis II Series: Principles of Learning and Teaching (PLT) and Content – Required for Admission to Professional Semester (Student Teaching)

The Praxis II exams are offered in a computer delivered format offered in testing windows. The test is taken at the Testing Center, 206B Whitesitt Hall or any other Prometric testing center according to their available schedule. A list of Prometric testing centers and registration is completed by going to www.ets.org/praxis. Candidates should go to <https://www.ets.org/praxis/ks/requirements> to identify the correct Praxis exams required for the state of Kansas.

All Elementary Education (Early/Late Childhood K-6) majors must take and pass the following two exams prior to admission to Professional Semester (Student Teaching)

- Required Component PLT Principles of Learning and Teaching: K-6 Content for Elementary
- Elementary Education: Curriculum, Instruction, and Assessment

Student teacher candidates for the fall semester must have both exams successfully completed and reported to the Office of Teacher Education by May 1. Candidates for the spring student teaching semester will be required to have successfully completed both exams and have scores reported to the Office of Teacher Education by November 1. Be aware that for ALL exams it takes approximately four weeks for scores to be returned to PSU Office of Teacher Education.

The Pittsburg State College of Education Professional Knowledge Base

Listed below are the basic descriptions of the core areas of the Professional Knowledge Base that inform the activities in class. For a full listing of the subskills, go to <http://www.pittstate.edu/college/education/teacher-education/pro-knowledge-base.dot>

The Learner and Learning- Professional educators must understand that learning and development patterns vary among individuals, that learners bring unique individual differences to the learning process and that learners need supportive and safe learning environments to thrive.

- The candidate knows how learning occurs (how learners construct knowledge, acquire skills and develop disciplined thinking processes) and how to use instructional strategies that promote individual growth.
- The candidate understands and identifies differences in approaches to learning and performance and designs experiences that incorporate individuals' strengths to promote growth.
- The candidate understands the processes needed to foster a respectful learning community.

Content - Professional educators must have a deep and flexible understanding of the field and be able to draw upon the central concepts and structures of their discipline as they work with learners. They integrate cross-disciplinary skills (e.g., critical thinking, problem solving, creativity and communication) to help learners apply content to propose solutions, forge new understandings, solve problems and imagine possibilities. Professional educators connect information to local, state, national and global issues.

- The candidate understands that learners should question, analyze and understand concepts from diverse perspectives.
- The candidate has a deep knowledge of student content standards and learning progressions in the discipline(s).
- The candidate realizes that content knowledge is not a fixed body of facts but is complex, culturally situated and ever evolving. S/he keeps abreast of new ideas and best practices in the field.

Instructional Practice- Professional educators understand and integrate assessment, planning and instructional strategies in coordinated and engaging ways for effective practice. They understand how to design, implement, interpret and communicate results from a range of assessments.

- The candidate knows how to engage learners in multiple ways of demonstrating knowledge and skills as part of the assessment process.
- The candidate understands the positive impact of effective descriptive feedback and knows a variety of strategies for communicating this feedback.
- The candidate understands the theories and processes of curriculum design (appropriate sequencing, developmentally appropriate instruction, builds on learners' prior knowledge and experiences).
- The candidate knows how to incorporate a variety of strategies that stimulate the cognitive processes associated with various kinds of learning (e.g., critical and creative thinking, problem framing and problem solving, invention, memorization and recall).
- The candidate knows how to apply a variety of developmentally, culturally and linguistically appropriate instructional strategies to achieve learning targets.

 Fall Spring Summer
(check all that apply)Prerequisite: Admission to Teacher Education and a grade of C or higher on EDUC 320 Developmentally Appropriate Curriculum for Elementary Education

Course Description (**as it will appear in the next catalog**): This two-hour face-to-face course involves the study and planning of an integrated curriculum unit synthesizing pre-service internship teachers' knowledge of domain specific content, KSDE Elementary Program Standards, and best practice pedagogy. New instruction in integrated, cross-disciplinary unit construction using the tenants of differentiated instruction and Understanding by Design processes is introduced to enable the construction of an integrated unit appropriate for the PSU Teacher Work Sample. The needs, interests, and developmental stages of elementary students- who can be linguistically, culturally, cognitively or physically diverse- within the internship class are drivers for the critical design features. The prerequisites for this class are admission into the teacher education program and having a C or better in EDUC 320 Developmentally Appropriate Curriculum for Elementary Education.

Purpose/Justification for Proposed Course: This course requires teacher candidates to write an integrated cross-curriculum unit of study and the course outcomes help fulfill the KSDE Elementary Education and Elementary Education Unified Standards.

Objectives/Student Learning Outcomes (as it will appear in the syllabus)

Course Objectives:

- Compare and contrast the differing integration models (intradisciplinary, interdisciplinary, or integrated studies) appropriate for the elementary learner.
- Use differentiated instruction to meet the specific learning needs of a given population of elementary students.
- Understand, and apply, the core components of backwards design (Understanding by Design) as a foundation for curricular unit construction.

- Identify how technology supports or hinders student learning.
- Select and prioritize relevant Kansas State Department of Education Curriculum Standards appropriate for an integrated unit of study.
- Identify the characteristics of a worthwhile learning experience, matched to the given Kansas State Department of Education Curriculum Standards, in-terms-of student learning and teacher delivery.
- Identify the specific learning needs of a given population of students and use that data as a key part of curriculum construction.

Assessment Strategies [e.g., exams, projects, university rubric, etc. **(as it will appear in the syllabus)**]

Module Quizzes: 10 pts. each.

Classroom Assignments/Exit Cards 5 pts. or 10 pts. each.

Peer Review UBD Three Stage Planning Template 15 pts.

Peer Review Unit Design Checklist and Feedback 20 pts.

UDB Three Stage Planning Template 100 pts. Differentiated Lesson/Techniques 50 pts.

Whole Class Collaborative Learning: 50 pts.

LARK Cooperative Score: 35 pts. Reflection; 20 pts.

If you wish to attach a syllabus, you may attach it to the end of this document as part of the packet.

Additional Questions

1. Additional resources required (e.g. library or multimedia resources, technology, space, major expense, etc.):
None

2. Will any additional student fees be required (e.g. equipment, clothing, travel, licensing, etc.)?
 Yes No *If "yes," please realize that it will need to gain approval of the President's Council.*

Please give the rationale for additional student fees:

3. Is this course to be considered for General Education? Yes No

If "yes," please indicate the University's General Education Goals met by this course AND the assessment data that will be collected to measure these goals:

Course Description and Prerequisites

This two-hour face-to-face course involves the study and planning of an integrated curriculum unit synthesizing pre-service internship teachers' knowledge of domain specific content, KSDE Elementary Program Standards, and best practice pedagogy. New instruction in integrated, cross-disciplinary unit construction using the tenants of differentiated instruction and Understanding by Design processes will be introduced to enable the construction of an integrated unit appropriate for the PSU Teacher Work Sample. The needs, interests and developmental stages of elementary students- who can be linguistically, culturally, cognitively or physically diverse- within the internship class are drivers for the critical design features. This course is to be taken during the internship block with the curriculum unit being taught during student teaching. The prerequisites for this class are admission into the teacher education program and having a C or better in EDUC XXXX: Curriculum Development for Elementary Education.

Course Text and Materials

- Tomlinson, C.A. (2017). *How to differentiate instruction in academically diverse classrooms*. (3rd ed.) Alexandria, VA: Association for Supervision and Curriculum Development.
- Tomlinson, C. A. and McTighe, J. (2006). *Integrating: Differentiated instruction and Understanding by Design*. Alexandria, VA: Association for Supervision and Curriculum Development.

Course Theme and Essential Question: The long-term purpose of this course is to help you understand how to systematically construct viable curriculum that is a best match for the needs of a given population of students. Doing so will provide you an understanding of the values, habits of mind, and curricular considerations required to promote a quality learning experience and educational environment for your students as learners and you as their teacher. *Students First!* is our guiding course theme. This is a very particular viewpoint which will serve as the foundation for our discussions throughout this semester as-well-as reinforcing the college's conceptual framework of a scholar/practitioner. We will explore this theme using a systems approach using the following essential question for guidance: *Is it possible to design and effectively teach integrated curriculum that is engaging, worthwhile, and meets the needs of ALL the learners in my class effectively?*

Course Objectives:

- Compare and contrast the differing integration models (intradisciplinary, interdisciplinary, or integrated studies) appropriate for the elementary learner.
- Use differentiated instruction to meet the specific learning needs of a given population of elementary students.
- Understand, and apply, the core components of backwards design (Understanding by Design) as a foundation for curricular unit construction.
- Identify how technology supports or hinders student learning.
- Select and prioritize relevant Kansas State Department of Education Curriculum Standards appropriate for an integrated unit of study.
- Identify the characteristics of a worthwhile learning experience, matched to the given Kansas State Department of Education Curriculum Standards, in-terms-of student learning and teacher delivery.
- Identify the specific learning needs of a given population of students and use that data as a key part of curriculum construction.

- Use a variety of methods to determine students’ misconceptions and assess their understanding.
- Design and use whole class collaborative processes (e.g. idea circles, literature circles, 6-traits writing process, or problem-based inquiry) during the curriculum unit.
- Design and use small group collaborative processes during the curriculum unit.
- Explicitly promote higher-level thinking and problem-solving skills for the given elementary students.
- Develop both constructionist [GRR] and constructivist [inquiry] lesson during the curricular unit.
- Differentiate individual lessons by content, process, product, or affect/learning environment to meet the needs of individuals or small groups of students.
- Gather and use a variety of print and electronic resources appropriate for the elementary level and use digital platforms for group interaction.
- Apply reflective metacognitive processes to deepen competency and understanding of integrated curriculum design.
- Act with increased levels of expertise, collaboration, and professionalism required for teachers in the field.
- Write and communicate effectively at a collegiate level using APA 6, proper citations, and evidence.

LARK Course Requirements

Rules are hard to remember particularly if there are a bazillion of them worded in negatives. I have used the LARK rules successfully in upper elementary classes all the way through to graduate classes to frame the required rules of behavior. The acronym represents the following question: Were my actions **Legal, Appropriate, Responsible, and Kind**? If the whole class, teacher included, can answer yes to these questions on a routine basis, then we will be able to form a respectful, warm learning environment this semester. The items below will help define what LARK looks like in action.

Attendance and Participation: Being in class is an expectation of mine and PSU. As a teacher, you wouldn’t skip a day and leave your kids and principal hanging. Nor would you wander in 10 minutes late. Best start to get in the professional habit from the start. 10 points added to your overall points at the end of the semester to your total grade for no days missed for whatever reason. One absence will get 5 bonus points. Two days receive no bonus points. If you are absent three or more days, regardless of the reason, you will be dropped from the class or your overall grade will be reduced. Please note that if you are late three times, it equals an absence.

Communication

On Friday, I will post specific readings and assignments for the upcoming week on our Canvas site in the Announcement section and the landing page of our site. We will be using Canvas for whole class assignments and grades. Changes in pacing or tweaking of assignments, in response to the needs of the class, *will* occur. Be alert! Concerning emails, generally I check my email in the morning and the afternoon of the work week. I don’t answer emails during the weekend except for Sunday evening.

Email Protocols: Constructing professional emails is part of professional interaction and has its own specific kinds of etiquette, nuance and meaning. Messages without correct salutations, upper case letters, major typos, slang or written in such a way that the tone could be called into question communicates far more about the sender than he or she intends. Consequently, when an email is sent it should be crafted by professionalism and care to your peers, professors, and to people out in the community. Things to think about before writing are:

- Would I say in person what this email specifically says?
- How could this email be misconstrued?
- Does this email represent my highest self?
- Am I sending this email to avoid a face-to-face conversation?

In like terms, if there is ever a concern about an email I send you, let’s talk in person so there is no confusion.

Facebooking, Texting, and Other Distracting Behavior in Class. We will be using our cell phones, laptops, or Chromebooks a great deal in class *for work*. Note the italics. Engaging in the listed behaviors during class time is an educational buzz kill for not only me but those around you during class. While you may be okay with being distracted, it also distracts everyone who can see your screen or your furious fingers but also sends a firm message of disrespect and disinterest in what is going on. This is a **personal hot button of mine** in terms social etiquette and fostering of a warm, professional learning community so best keep things on the straight and narrow.

The Kansas Standards for Professional Education

Standard 7: Planning for Instruction. The teacher plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, technology, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.

The Pittsburg State College of Education Professional Knowledge Base

Listed below are the basic descriptions of the core areas of the Professional Knowledge Base that inform the activities in class. For a full listing of the subskills, go to <http://www.pittstate.edu/college/education/teacher-education/pro-knowledge-base.dot>

THE LEARNER AND LEARNING

Professional educators must understand that learning and development patterns vary among individuals, that learners bring unique individual differences to the learning process and that learners need supportive and safe learning environments to thrive.

1. The candidate knows how learning occurs (how learners construct knowledge, acquire skills and develop disciplined thinking processes) and how to use instructional strategies that promote individual growth.
2. The candidate understands that cognitive, linguistic, social, emotional and physical development influences learning.
3. The candidate understands and identifies differences in approaches to learning and performance and designs experiences that incorporate individuals' strengths to promote growth.
4. The candidate understands students with exceptional needs and knows how to use strategies and resources to meet these needs.
5. The candidate knows how to access information about the values of diverse cultures and communities and how to incorporate languages, experiences, cultures and community resources into practice.
6. The candidate understands how to manage the learning environment by organizing, allocating and coordinating the resources of time and space.
7. The candidate knows how to design experiences using strategies that enhance learner motivation and engagement.
8. The candidate understands the processes needed to foster a respectful learning community.

CONTENT

Professional educators must have a deep and flexible understanding of the field and be able to draw upon the central concepts and structures of their discipline as they work with learners. They integrate cross-disciplinary skills (e.g., critical thinking, problem solving, creativity and communication) to help learners apply content to propose solutions, forge new understandings, solve problems and imagine possibilities. Professional educators connect information to local, state, national and global issues.

9. The candidate understands that learners should question, analyze and understand concepts from diverse perspectives.
10. The candidate has a deep knowledge of student content standards and learning progressions in the discipline(s).
11. The candidate knows how to use supplementary resources and technologies effectively to ensure accessibility and relevance for all.
12. The candidate understands how disciplinary knowledge can be applied as a lens to address local and global issues.
13. The candidate realizes that content knowledge is not a fixed body of facts but is complex, culturally situated and ever evolving. S/he keeps abreast of new ideas and best practices in the field.
14. The candidate knows major concepts, assumptions and debates that are central to the discipline.

INSTRUCTIONAL PRACTICE

Professional educators understand and integrate assessment, planning and instructional strategies in coordinated and engaging ways for effective practice. They understand how to design, implement, interpret and communicate results from a range of assessments.

15. The candidate knows how to engage learners in multiple ways of demonstrating knowledge and skills as part of the assessment process.
16. The candidate understands the positive impact of effective descriptive feedback and knows a variety of strategies for communicating this feedback.
17. The candidate knows how to engage learners actively in the assessment process and to develop each learner's capacity to reflect on and communicate about their individual progress.
18. The candidate understands the theories and processes of curriculum design (appropriate sequencing, developmentally appropriate instruction, builds on learners' prior knowledge and experiences).
19. The candidate understands the process for aligning instruction and assessment with learning targets.
20. The candidate understands how theory, research and best practices impact ongoing planning and instructional practice.
21. The candidate knows how to engage learners in using technology tools and a range of skills to access, interpret, evaluate and apply information.
22. The candidate knows how to incorporate a variety of strategies that stimulate the cognitive processes associated with various kinds of learning (e.g., critical and creative thinking, problem framing and problem solving, invention, memorization and recall).
23. The candidate knows how to apply a variety of developmentally, culturally and linguistically appropriate instructional strategies to achieve learning targets.

PROFESSIONAL RESPONSIBILITY

Professional educators create and support safe, productive learning environments. They must engage in meaningful and intensive professional learning and self-renewal by regularly examining practice through ongoing study, self-reflection and collaboration. Professional educators contribute to accomplishing their school's mission and goals and demonstrate leadership by modeling ethical behavior, contributing to positive changes in practice and advancing their profession.

25. The candidate knows how to use information and technology ethically, legally and safely.
