

How to download and install Forticlient VPN for your Windows PC

1. Navigate your browser to <https://forticlient.com/downloads>. Scroll down and select the *Download for Windows* button.

2. Run the downloaded FortiClient installer. You will need to accept the license agreement. Then click “next” through the options until it installs. Click “Finish” when the installer completes.

3. Look for a blue shield in your desktop tray. Click it and select *Open FortiClient Console* from the popup menu.:

4. When FortiClient starts up, select the checkbox and click *I accept*. On the following popup, click the link that says *Configure VPN*.

5. Fill in the configuration options as in the following picture, replacing email@pittstate.edu with your @pittstate.edu email address. For students and student employees, this will be your @gus.pittstate.edu address. Save that configuration.

The screenshot shows the FortiClient VPN configuration window. At the top, there is a blue header with the FortiClient VPN logo and a message: "Upgrade to the full version to access additional features and receive technical support." Below the header, the main content area is titled "New VPN Connection".

The configuration options are as follows:

- VPN:** Three tabs are visible: "SSL-VPN" (selected), "IPsec VPN", and "XML".
- Connection Name:** A text input field containing "fortivpn.pittstate.edu".
- Description:** A text input field containing "PittVPN".
- Remote Gateway:** A text input field containing "fortivpn.pittstate.edu" with a close icon (x) on the right. Below it is a "+Add Remote Gateway" button.
- Customize port:** A checkbox that is unchecked, followed by a text input field containing "443".
- Enable Single Sign On (SSO) for VPN Tunnel:** A checkbox that is unchecked.
- Client Certificate:** A dropdown menu currently set to "None".
- Authentication:** Two radio buttons: "Prompt on login" (unchecked) and "Save login" (checked).
- Username:** A text input field containing "email@pittstate.edu", which is highlighted with a yellow border.
- Do not Warn Invalid Server Certificate:** A checkbox that is unchecked.

At the bottom of the form, there are two buttons: "Cancel" and "Save".

6. Enter your unified Pitt State password and choose *Connect*.

VPN Name	<input type="text" value="fortivpn.pittstate.edu"/>	☰
Username	<input type="text" value="email@pittstate.edu"/>	
Password	<input type="password" value="....."/>	

Connect

Once your VPN is successfully connected, a lock will appear on the FortiClient icon in your browser tray. You are now able to access your PSU computer resources.
