iPhone VPN Configuration

1. Using the Appstore, search for the FortiClient app and install it.

DEVELOPER Fortinet

2. Once the app has finished installing, launch the application and using your PSU email address (employees: @pittstate.edu - students: @gus.pittstate.edu), your PSU password, and configure FortiClient to match the following:

Name Host	fortivpn.pittstate.edu
Host	
	fortivpn.pittstate.edu
Port	443
User	gus@pittstate.edu
SERVER CERTIFICATE	
Hide invalid certifica	ite warning
CLIENT CERTIFICATE	
Use Certificate	
File Name	None available 🗧
Passphrase	••••••
Summary	

3. After you've finished configuring the application, attempt to connect and you'll be prompted to input your password again. Once you've entered your password, hit 'OK'.
